

St. Gianna Clinic: Faithful Family Medicine

St. Gianna Clinic is dedicated to delivering compassionate and comprehensive care to individuals and families across all stages of life.

Our practice is designed to cater to the diverse needs of women, men, and children—all in line with the Catholic Faith. We offer a wide array of services including chronic care management, pediatrics, obstetrics and gynecology, as well as specialized care for senior family members. Our quality medical care is all conveniently located in one welcoming location.

Your family's health is important—and having established medical care is crucial for maintaining it.

At St. Gianna Clinic, our physicians want to foster a continuous, trusting relationship with you, making sure you receive prompt and proper care. St. Gianna Clinic provides same-day appointments to ensure you receive the care you need, when you need it. We strive to know each of our patients personally, encouraging regular check-ups and becoming familiar with your individual health needs and history so we can provide the best care possible. If you are an established patient and have any concerns, you are always welcome to speak with our nursing staff regarding yourself or your family members. Your wellbeing matters—and whether in cases of emergencies or ongoing care, we are here for you!

The St. Gianna Clinic provides faithful, Catholic medical care—so you can rest assured that your treatment will be in line with your morals and values.

As a Catholic nonprofit, we see St. Gianna Clinic as our mission field, where we treat our patients with the utmost respect and compassion. Having a faith-filled environment also creates a unique approach to healthcare, where we recognize the importance of both your physical, mental, *and* spiritual health. The chapel at our clinic is always open to our physicians, staff, and patients!

At St. Gianna Clinic, we want to offer the best care possible—and this requires regular check-ups and follow-up care.

Please don't put off these appointments! They are a crucial part of taking care of your health, so that we can find any potential problems *before* they become a serious issue. Our physicians are here to identify any risk factors or early signs of diseases, monitor ongoing health issues, adjust treatments, and make sure that you are taking care of yourself. It's important to also check in with your physician regarding your nutrition, exercise, stress, and other lifestyle factors that can have a huge impact on your overall well-being.

Don't hesitate to reach out to make an appointment today!

Meet Our Physicians

Our physicians are from a variety of backgrounds that come together to form a cohesive team, ready to meet your needs.

Dr. Robin Goldsmith, MD is a wife, mother of four sons and an Anesthesiologist. After attending the University of Notre Dame for undergraduate studies and University of Wisconsin for medical school, she completed a residency and fellowship in OB Anesthesia, and during fellowship she received the Gertie Marx Society of Obstetric Anesthesia and Perinatology research award. She is the co-founder of the St. Gianna Clinic and the St. Gianna Molla Guild NEW.

Dr. Thomas Reinardy, MD is an Obstetrician and Gynecologist who has been in practice in Wisconsin since 1997. His medical focus in women's health includes obstetrics, well women exams, pelvic floor dysfunction, and incontinence. He provides care from young adulthood through menopause and assists in diagnosis and treatment of infertility, prenatal care and delivery, and nearly all forms of gynecologic surgery. Dr. Reinardy grew up in Wisconsin and is married to his wife Angie with two adult children.

Dr. Madeleine Guevara, DO is an obstetrician/gynecologist, wife, and mother of four children. She sees patients from early adolescence through the full spectrum of life, including after menopause. She is commonly consulted by those desiring a holistic, life-affirming, Catholic approach to women's care. This includes routine visits and physicals, fertility awareness and family planning, obstetrics, high risk prenatal care and deliveries, minimally invasive gynecologic surgery, robotic surgery, NaProTECHNOLOGY® and infertility.

Dr. Edward Bayer, MD became a pediatrician because children are our future. He felt he could make the most impact in preventative health. Having attended both undergraduate and medical school at the University of Wisconsin and his residency in Pediatrics at Vanderbilt University Medical School in Nashville, TN, he enjoys working with and helping teach parents how to instill healthy habits that their children can carry on into adulthood as preventative strategies for maintaining health.

Dr. Charles Cassidy, MD, before practicing medicine, practiced law with Catholic Charities of LA and served with Catholic Relief Services in Moldova. After medical school, he completed his residency in family medicine, was trained in NaProTechnology at the Pope Paul VI Institute, and obtained advanced training in obstetrics, surgery, ultrasound, HIV, and tropical medicine. After residency, he volunteered in a rural Haitian hospital for 6 months before he joined the St. Gianna clinic in 2019. At the St. Gianna Clinic, Dr. Cassidy provides family medicine and women's care services. He is fluent in both English and Spanish, and certified by the American Board of Family Medicine.

Dr. James Joyce, MD graduated from Creighton University School of Medicine and has completed his residency in Family Medicine. He began his career by opening a Family Medical Center in Ivanhoe, MN, then worked as a family medicine physician including obstetrics for 33 years. He and his wife Kathleen have nine living children and seven grandchildren so far. Throughout his years as a family physician, his calling has remained the same—to be a humble servant of all.

Dr. Robert J. Rucinski, MD has over 25 years of experience in psychiatry, and serves as a Volunteer Psychiatrist at St. Francis Free Clinic in his hometown of Oshkosh, Wisconsin, where he is now married with four sons. He received three undergraduate degrees (in chemistry, biology, and microbiology) before attending medical school at the University of Wisconsin. After this, he completed a general Psychiatry Residency and a Residency in Child and Adolescent Psychiatry, and he is board certified in both of these areas.
